BrainCheck

Understand the condition of your cognition

Healthy mind. Healthy body.

A healthy mind promotes a healthy body. Studies have shown optimizing brain health can improve mental and physical health, leading to greater well-being and quality of life.¹

Recent advancements in cognitive assessments are translating traditional tests into trusted digital tools, offering patients a more accurate and accessible way to quickly and easily evaluate their brain health.

By establishing a baseline and tracking results over time, BrainCheck empowers you to take a proactive approach to preserve your brain health and promote peace of mind.

**Ask your doctor
for a BrainCheck
at your next visit.**

What is BrainCheck?

BrainCheck is your partner in cognitive care, providing a proven platform solution from screening to surveillance – making cognitive testing easier than ever.

With just a few quick taps of your finger, you can complete a series of fun, interactive tests, allowing your doctor to accurately assess your cognitive health.

Using clinically-validated neuropsychological exams, our digital cognitive assessment precisely measures performance across a range of domains.^{2,3,4}

Plus, our normative database powers objective scoring, comparing your results against a diverse population.

Screen™ ⌚ 3 minutes

Quickly and accurately check your cognitive health and determine if further testing may be needed.²

Assess™ ⌚ 15 minutes

Comprehensively and objectively evaluate your cognitive function and detect subtle signs of decline as early as possible.^{3,4,5}

Plan™

Personalized care plans take the guesswork out of next steps for patients and their families.
